15 December 1941, "Die Chemische Industrie," No. 49/50

According to official statistics, petroleum production in Albania in the last few years was as follows:

1936	48,330 tons	1938	116,800 tons
1937	87,910 "	1939	125,000 "

9 October 1942, "Nechrichten for Aussenhandel," No. 236

Explorations in the Kruja district have indicated that there is an oil field there covering 3,000 hectares, or five times the area of the Devoll field.

30 October 1942, "Chemische Industrie," No. 43/44

In the newly explored oil fields in the Kruja region, oil was found in many places at a depth of only 20 meters.
